

**Hamilton County Office of Emergency Management
Special Operations Division**

Response Equipment

Hazmat Capabilities: Two heavy-duty Hazmat Response Trucks and two F-350 4x4 multi-purpose response trucks. The team also has two river boom trailers to support any petroleum spills in waterways. 1 Enclosed cargo trailer that has extra equipment and a small command area available.

Marine capabilities- 24-foot utility boat with down scan and side scan sonar. Also, we have a fire pump mounted to assist with a marine fire response.

Wildland Fire/Storm Response- the team is equipped with 3 UTV's with one having a fire skid unit. The team also has a 20 ft. enclosed trailer with chainsaws, pole saws, generators, and miscellaneous tools and equipment to help with a response.

Technical Rescue—The team is capable of supporting rope rescue operations and search and rescue operations with NFPA-rated rope gear and UTVs to assist off-road operations.

On-scene breathing air: The team has a mobile air trailer with the capability to fill SCBA bottles or dive bottles. Also, there is a built-in generator for on-site power.
